

THE Reef[®] ROCK

Reefscaping nature rocks

Collected in the Oceania tropical nature
100% natural rock, 0% artificial rock

THE REEF ROCK[®] is a ready-to-use natural rock collected from a sustainable source causing a low environmental impact and no damage to natural coral reef. It is not man-made, it is guaranteed 100% natural calcium carbonate limestone-structured aragonite dry rock. Safe to use for all marine fish and reef aquariums as well as cichlids and hard water freshwater aquariums. Will not leach any undesirable contaminants or affect the aquarium nitrogen cycle and may therefore be added to new aquariums and established tanks alike. Professionally cleaned and dried, free of pests & unwanted pesky hitchhikers (aiptasia spp., majano anemones, fire worms, flatworms, pyramidellid snails, mantis Shrimp (stomatopods) and valonia bubble nuisance algae).

Easily stackable to create one-of-a-kind aquascapes that feature pillars, shelves, overhangs and caves.

Very light due to its extremely natural porosity with plenty of surface area to grow beneficial nitrifying and denitrifying bacteria to act as biological filter to help maintain pristine water conditions in your aquarium.

Cheaper, better weight/volume ratio and more environmentally friendly than live rock. We recommend 1 to 2 lbs (0,45 to 0,90 kg) of rock per gallon (3,78 liters) of aquarium water. 1 pound (0,45 kg) per gallon (3,78 liters) for an open-water landscape with more space for your fish to swim. 2 pounds (0,90 kg) per gallon (3,78 liters) for a denser landscape so you can create more caves/crevices and more area to place your corals. Please note the pictures displayed on our website are merely representative of the rock you will receive so the actual size, shape and appearance will vary with each order. To seed your aquarium with beneficial bacteria, just place a separate piece of quality live rock in your tank along with The Reef Rock or use a bacterial supplement to kickstart the cycling process. Soon your dry rock will be alive and beautiful!

Features

- > 100% natural aragonite rock.
- > Suitable for reef and marine aquariums.
- > Suitable for cichlid and hard water aquariums.
- > Clean, safe and easy to build your reefscape.
- > Free of pests & unwanted pesky hitchhikers.
- > Very large surface area for bacterial colonisation.
- > Natural pores aid in biological filtration, water circulation and provide hiding places for fish and invertebrates.
- > Bond together to form larger structures.
- > Low environmental impact.

On request :

For zoo and public aquariums, we can arrange show size rocks of 20 Kg, 40 Kg and up to 50 - 60 Kg.

Specifications THE REEF ROCK[®] is supplied in different packaging :

TRR01 – 20 kg box small size rocks.

Contains a mix of small size rock ranging from 13 cm (5 inch) to 20 cm (8 inch) size. Each rock weight 0,5 kg to 1,5 Kg.

TRR02 – 20 kg box medium size rocks.

Contains a mix of medium size rock ranging from 20 cm (8 inch) to 24 cm (10 inch) size. Each rock weight 1,5 kg to 2,5 Kg.

TRR03 – 20 kg box large size rocks.

Contains a mix of large size rock ranging from 26 cm (10 inch) to 32 cm (13 inch) size. Each rock weight 3 kg to 4,5 Kg.
